

It's Like That Now

Words + Music by: Deiren Masterson © 2005

Confusion, seems like it just keeps walking
Picked up some attitude and now it's strutting
Thinks it owns this town
The same way cancer grows,
Then thinks it's strong, now

Break down the truth until it suits you
Rearrange it 'til it fits you
You're an atomic bomb
And now it's day to day, amidst your fall out

I've been around
And I can say for sure
It's like that, oh ya it's like that now

Sex has become our sacred cow
A whole religion unto itself
And now that sex is free
Ya it's so good to see that we're so happy

Throw away another life commitment
Like some contract that was written
Like there's no blood involved
And all your wash-away pain has left quite a stain now

I've been around
And I can say for sure
It's like that, oh ya it's like that now

I still hold a vision that's deep inside me
Like an anchor that's meant to guide me
You can call it root cause
But there is good to be had and so it whispers

Hold strong, keep your head up, keep on walking
Part the seas if it's them that's blocking
You from your first fresh breath
And when the air is clean
I hope you'll find me

Now I've been around
And I can say for sure
It's like that, oh ya it's like that now
